## CONQUER KITCHEN CLUTTER

Tired of messy cabinets and drawers? We've got space-saving products and clever tips to help you organize the busiest room in the house.

## MORE GREAT TIPS

Roll with it: Retrofit your deep, dark lower cabinets with roll-out drawers to make contents a cinch to reach.

Drop a line: Shelf liners make cabinet interiors easier to clean and add brightness to dark spaces. If you choose a grippy, cushioned version, you'll also give your breakables extra protection.

Divide and conquer: In the pantry, group like with like, then use shelf dividers to create a visual separation between baking supplies and breakfast cereals.

Pretty, please: Choose containers you love. "Beautiful things motivate you to keep them organized," says Noelle Micek, owner of the San Francisco company An Organized Nest.
